*custom colors*

exactly what you want

*it's perfect!*  
custom colors

We can create cabinetry that matches any paint swatch. Bring the swatch to your StarMark Cabinetry dealer—that's all it takes to start your custom Tinted Varnish project.

If your heart's desire is a color you spied in a magazine or in a fabric, or you have furniture you want to match or complement, talk to your StarMark Cabinetry dealer about preparing a sample of wood that will guide us in creating a stain for your cabinetry.

A custom stain takes more legwork (from both you and us) than a custom paint, but we'll put our heart into it. With good direction from you and our experience creating custom stains, the legwork will result in a beautiful finish you'll be proud to have in your home. Talk to your StarMark Cabinetry dealer about the additional costs and delivery times for a custom color.

Shown here on the Syracuse door style in Maple.  
Villa Pearl is a Tinted Varnish-based Specialty Color.

# classic white & off white

## Linen

A specialty color for Maple cabinetry

Linen finishes feature Latté glazing and speckling for a softer tone, and rounded corners for an heirloom feel. Available on Maple door styles.

Melbourne door style in Maple finished in Linen Mushroom

This icon indicates that the color can receive Old World Distressing illustrated on pages 58-59.

## Speckling

To speckle the Linen finish, a subtle stain is randomly applied to the surface of the Linen finish. These spots will be the size of a pencil eraser diameter or smaller. Speckling complements the Latté glaze.

**LINEN IVORY**

Shown here on the Gallant door style in Maple.

Linen Ivory is a Tinted Varnish-based Specialty Color.

# handsome brown

To speckle the Chateaux finish, a subtle stain in dark brown is randomly applied across the surface of the finish. These spots will be no larger than the diameter of a pencil eraser.

**CHATEAUX NUTMEG**

Shown here on the Redcliff door style in Cherry.

**CHATEAUX OREGANO**

Shown here on the Harmony door style in Cherry.

**CHATEAUX TOFFEE**

Shown here on the Breckenridge door style in Cherry.

**SPECIALTY COLORS** are cabinetry finishes that take your room to a whole new level. Artistic effects are added to popular colors to add character and in some cases, a vintage feel.

**Chateaux** is a specialty color for Cherry and Rustic Cherry cabinetry

Chateaux is created by randomly applying several distressing techniques, softening all edges, padding the edges to create shadowing, and adding speckling to accentuate the distressing. Patina is accomplished with **1. rounded corners** **2. worn edges** **3. knife cuts** **4. worm holes** **5. rasping** **6. dips** and **7. light chain distressing** that we hand apply to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability. Brown Chateaux colors are shown on this page. Chateaux is available on Cherry and Rustic Cherry door styles.

**CHATEAUX CAPPUCINO**

Shown here on the Arlington door style in Cherry.

## Homestead Fog

A specialty color for Alder and Rustic Alder

Homestead Fog is a gray tinted varnish applied to Alder and Rustic Alder. Several distressing techniques are applied randomly and heavily. Distressing marks are **1. rounded corners**, **2. worn edges**, **3. knife cuts**, **4. abundant worm holes**, **5. rasping**, **6. dips**, **7. light chain distressing** and **8. chiseling**. They are applied to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability. Homestead Fog is available on all Alder and Rustic Alder door styles.

### HOMESTEAD FOG

Shown here on the Hanover door style in Alder.  
Homestead Fog is a Tinted Varnish-based Specialty Color.

**SPECIALTY COLORS** are cabinetry finishes that take your room to a whole new level. Artistic effects are added to popular colors to add character and in some cases, a vintage feel.

THIS FIREPLACE SURROUND was created with the Harrison door style in Alder finished in Homestead Fog.

## Chateaux Brittany

A specialty color for Cherry cabinetry. Chateaux is created by randomly applying several distressing techniques, softening all edges, padding the edges to create shadowing, and adding speckling to accentuate the distressing. Patina is accomplished with **rounded corners, worn edges, knife cuts, worm holes, rasping, dips and light chain distressing** that we hand applied to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability.

Chateaux is available on all Cherry and Rustic Cherry door styles.

### CHATEAUX BRITTANY

Shown here on the Tudor door style in Rustic Cherry. Chateaux Brittany is a Stain-based Specialty Color.

## CHISELING

Chiseling is used to create Homestead.

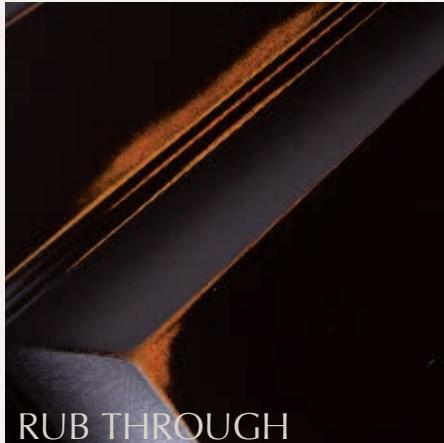

## DIPS

Dips are used to create Chateaux and Homestead and they are included in Old World Distressing.

## KNIFE CUTS

Knife Cuts are used to create Chateaux and Homestead and they are included in Old World Distressing.

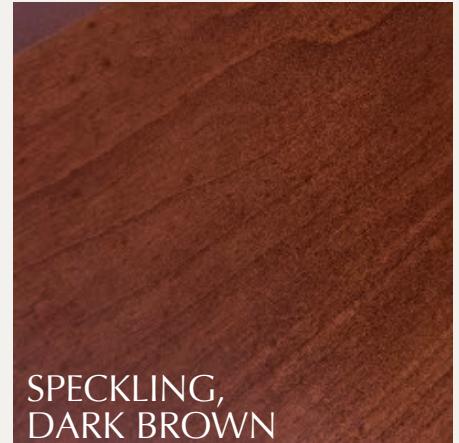

## RUB THROUGH

Rub Through is used to create Amaretto and Bordeaux.

## SPECKLING, LIGHT BROWN

Speckling is used to create Linen.

## SPECKLING, DARK BROWN

Speckling is used to create Chateaux.

# Distressing illustrated

StarMark Cabinetry uses several techniques to add character and appeal to cabinetry. They are illustrated on these two pages. All of our distressing marks are added by hand. There is no machine and there is no robot that can successfully duplicate what the eyes and hands of an artisan achieve through personal handling of the cabinetry.

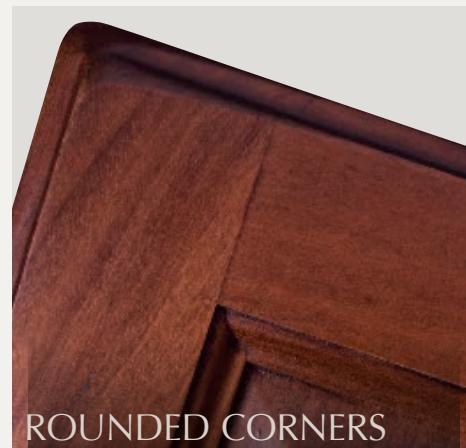

### PADDING

Padding is used to create Chateaux.

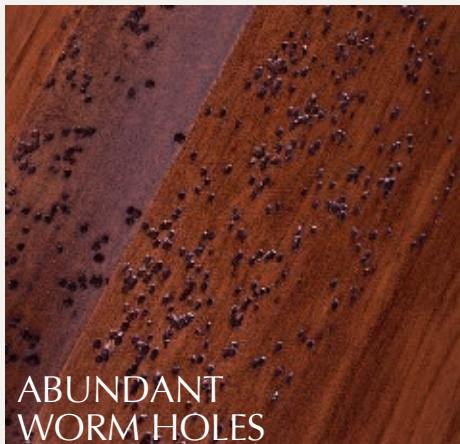

### RASPING

Rasping is used to create Chateaux and Homestead and it is included in Old World Distressing.

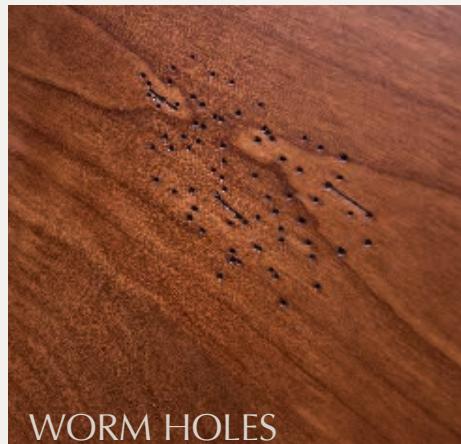

### ROUNDED CORNERS

Rounded Corners are used to create Amaretto, Bordeaux, Chateaux, Homestead, Licorice, Linen and Oatmeal. They are included in Cottage Distressing and Old World Distressing.

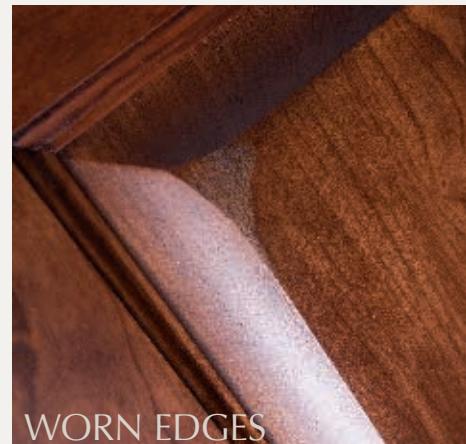

### ABUNDANT WORM HOLES

Abundant Worm Holes are used to create Homestead.

### WORM HOLES

Worm Holes are used to create Chateaux and are included in Old World Distressing.

### WORN EDGES

Worn Edges are used to create Amaretto, Bordeaux, Chateaux, Homestead, Licorice, Linen and Oatmeal. They are included in Cottage Distressing and Old World Distressing.

## A Light Touch

### SPATTERING

Spattering is a dark stain, hand applied randomly to the cabinetry.

- Spattering on stain with glaze combinations is free of charge.
- Spattering on an unglazed stain is available on all species at an upcharge.

### LIGHT CHAIN DISTRESSING

Light Chain Distressing is used to create Amaretto, Bordeaux, Chateaux, Homestead, Licorice, Linen and Oatmeal. It is included in Cottage Distressing and Old World Distressing.

- Light chain distressing on Tinted Varnish with glaze combinations is free of charge.

Light chain distressing is available at an upcharge on:

- all stains on any wood type
- all stain with glaze combinations on any wood type
- all Tinted Varnish on Maple, Oak or Quarter Sawn Oak

THIS DINING ROOM cabinetry was created with the Harbor door style in Maple finished in Mushroom with Chocolate glaze and Cottage Distressing and the Bridgeport door style in Cherry finished in Chestnut. Optional five-piece drawer headers were used.

Look for this icon  
on pages 50-51 for  
color combinations  
that can receive  
Old World Distressing.

Old World Distressing blends your new cabinetry with today's popular distressed furniture pieces. Certain distressing techniques are randomly applied to the face of your cabinetry throughout the design. These techniques (illustrated at right) are:

1. rounded corners
2. light chain distressing
3. worm holes
4. dips
5. rasping
6. knife cuts
7. worn edges.

# OVERLAY DOOR STYLES AND PRICE COLUMNS

timeless craftsmanship  
inset cabinetry

THIS KITCHEN was created with the Fairhaven inset door style in Quarter Sawn Oak finished in Pearl with Bronze glaze. Standard slab drawer headers were used.

StarMark Cabinetry's inset door collection is shown on these two pages.  
To best illustrate the profiles, each door is shown in Maple finished in Natural.

**SCOOPED PROFILED DRAWER HEADER**  
Available on the Danburg, Merrimac and Woodlawn inset door styles.

### INSET DRAWER HEADER OPTIONS

**FIVE-PIECE DRAWER HEADER**

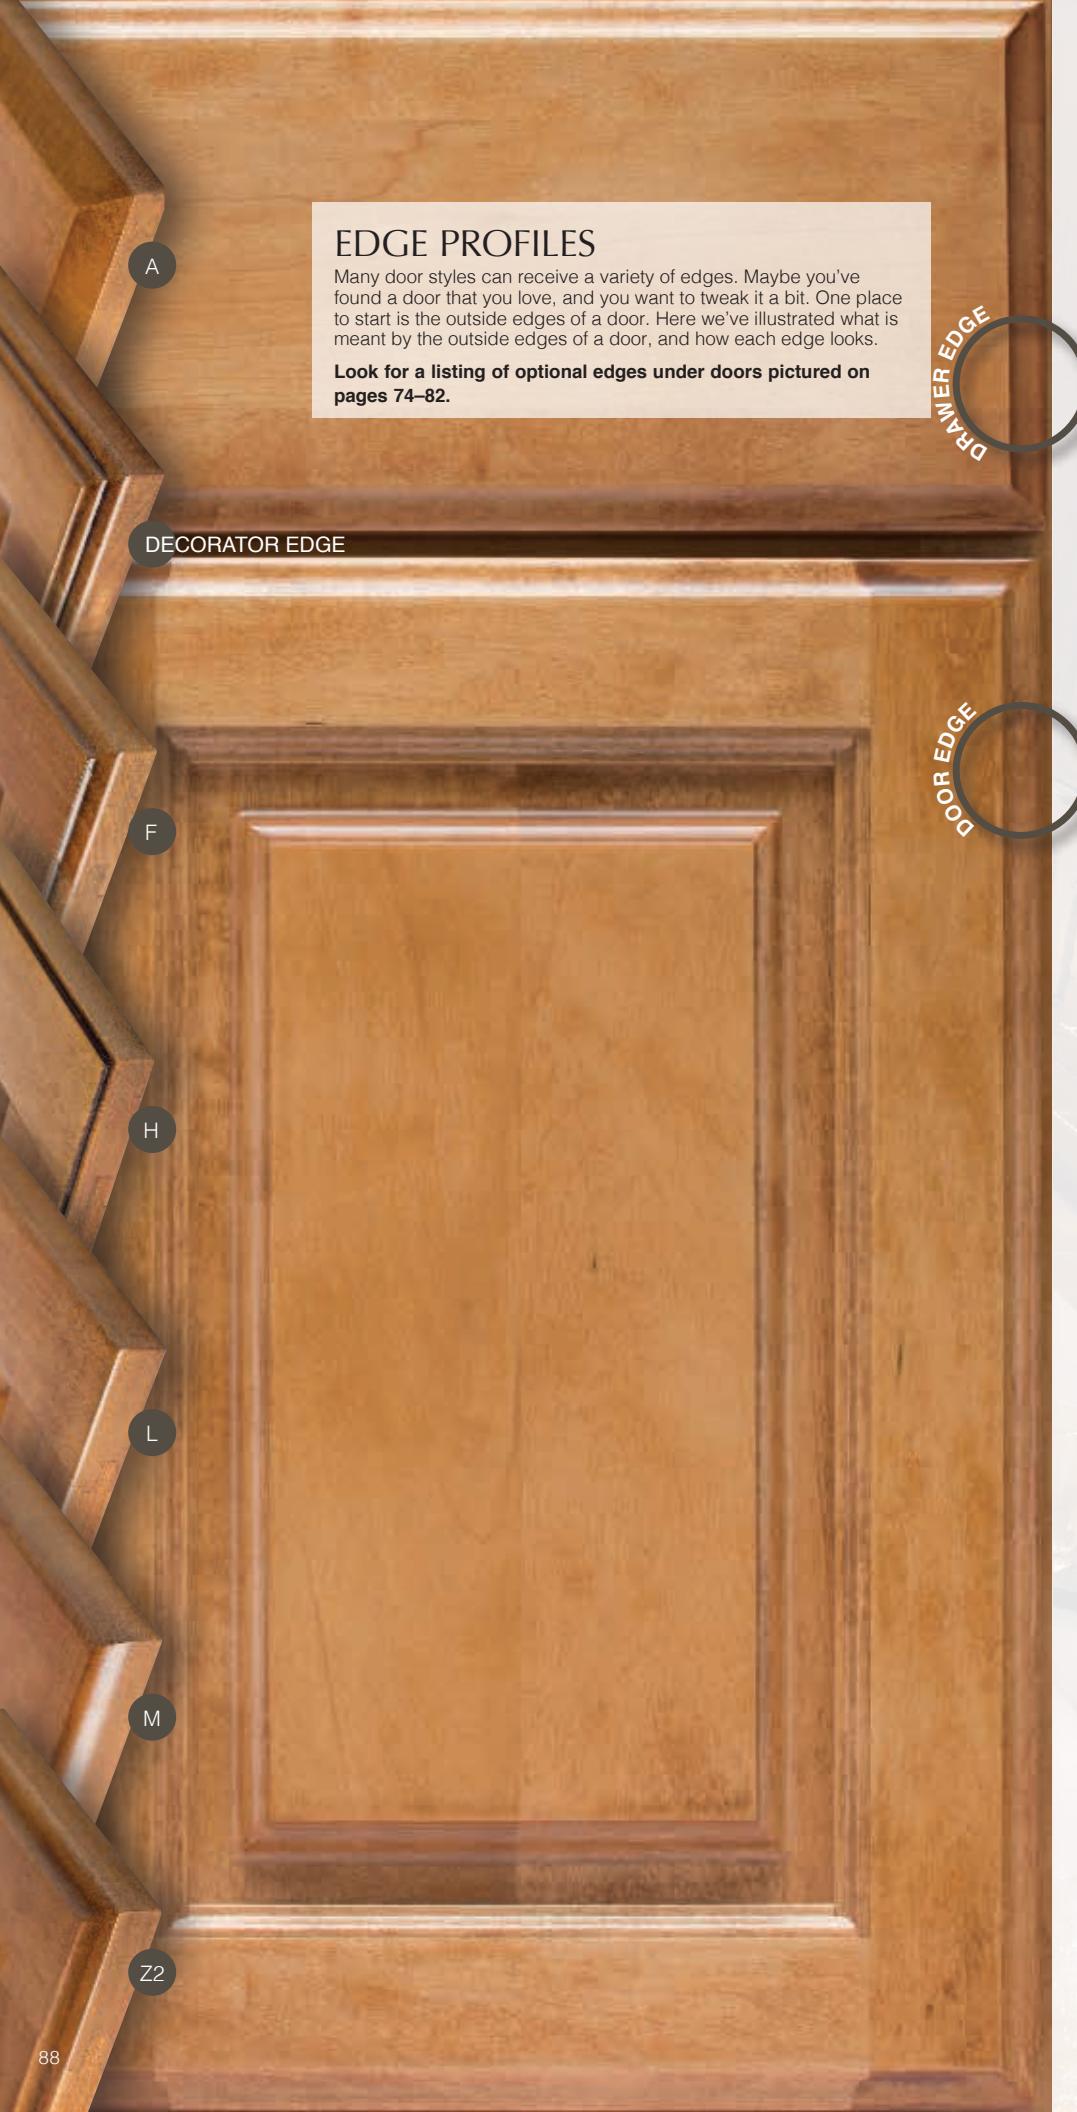

Available on all inset door styles.

**ROLLED PROFILED DRAWER HEADER**

Available on the Allentown, Kingsberry, Laforest, Montico and Rock Elm inset door styles.

## EDGE PROFILES

Many door styles can receive a variety of edges. Maybe you've found a door that you love, and you want to tweak it a bit. One place to start is the outside edges of a door. Here we've illustrated what is meant by the outside edges of a door, and how each edge looks.

**Look for a listing of optional edges under doors pictured on pages 74–82.**

DRAWER EDGE

DECORATOR EDGE

DOOR EDGE

Hudson door style with single furniture pegs

Hudson door style with double furniture pegs

## FURNITURE PEGS

This option gives rustic character to doors and drawers. A  $\frac{3}{16}$ " square wooden peg is driven into a  $\frac{3}{8}$ " diameter drill hole. The gaps between the peg and the hole are visible and are not filled. Single and double pegs (illustrated above) are available.

**Look for this symbol □ under doors pictured on pages 74–82, 86–87.**

style options

THIS KITCHEN was created with the Tempo door style in Quarter Sawn Oak finished in Chestnut. Glass inserts in the Half Inch Reed pattern were used in the doors.

## FIVE-PIECE DRAWER HEADER

A five-piece drawer header is standard on select door styles. A door's standard drawer header is listed under each door on pages 59–71. Look for the words "Drawer header is five-piece."

A five-piece drawer header is also an option on many door styles. Those door styles are shown here.

**Look for this symbol "5" under doors pictured on pages 74–82.**

## REGENT PROFILE

The Regent Profile has three graduated steps ascending to the center of the drawer header front, adding dimension and detailing for minimal cost.

Look for this symbol R under doors pictured on pages 74–82.

## PROFILED DRAWER HEADER

Select doors can receive a Profiled drawer header. Compared to a standard slab drawer header, a drawer header with a Scooped Profiled edge or a Rolled Profiled edge has a more distinct and decorative look.

Depending on which profile best complements the door style, the profile we add will be "Scooped" or "Rolled".

Look for the symbol PS or PR under doors pictured on pages 74–82.

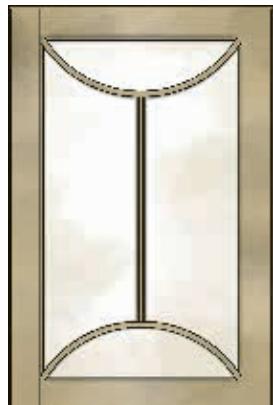

## DECORATIVE STORAGE FOR DRAWERS

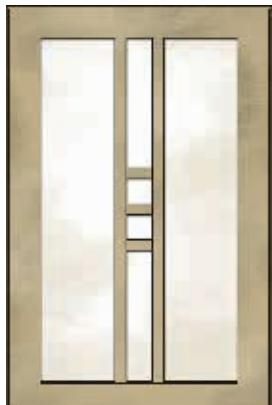

Shown above with clear glass.

Inserts are shown on pages 94–95.

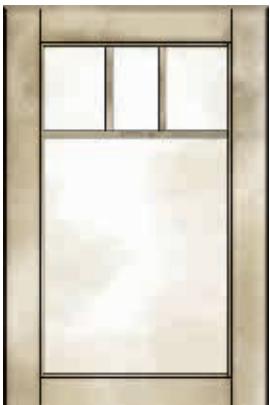

The styling options shown pages 88–91 are available on select doors. Please consult with your StarMark Cabinetry dealer to determine the options available for the door you chose.

# wood types

**Alder** is a softer wood with a fine straight grain and even texture. Color is light brown with yellow or reddish tinge, with little difference between heartwood and sapwood. Alder does not evolve in color or darken when exposed to light or heat as other woods do, and takes stains and finishes well. More than some of the other woods, care must be taken to avoid damage due to its softer nature. Some small tight knots can be found with standard Alder.

**Cherry** displays a distinctive grain pattern and warm color. The color ranges from nearly white to dark reddish brown. Dark pockets, pin knots, and random streaks are common. More than most woods, Cherry will darken when exposed to light, especially in light stains. The more sun Cherry receives, the faster it will darken. This will be most evident in new wood and will slow as it ages.

**Hickory** is a heavy, strong wood. It is known for flowing, vibrant grain patterns and dramatic color variations. Hickory can also exhibit random pecks, burls, and mineral streaks. Hickory's color ranges across a wide spectrum, from nearly white to dark brown.

**Rustic Alder, Rustic Cherry And Rustic Hickory** refers to the Rustic versions of these species. It is characterized by knots, burls and mineral streaks found on center panels, stiles and rails of the door, and on the drawer headers, which could impact hardware placement. Knots will be sound and will be closed, but certain angles could show light through the knots. Glazing rustic species will enhance these unique characteristics.

△ THIS SYMBOL IS SHOWN UNDER DOORS ON PAGES 74-82 TO INDICATE THEY ARE AVAILABLE IN RUSTIC.

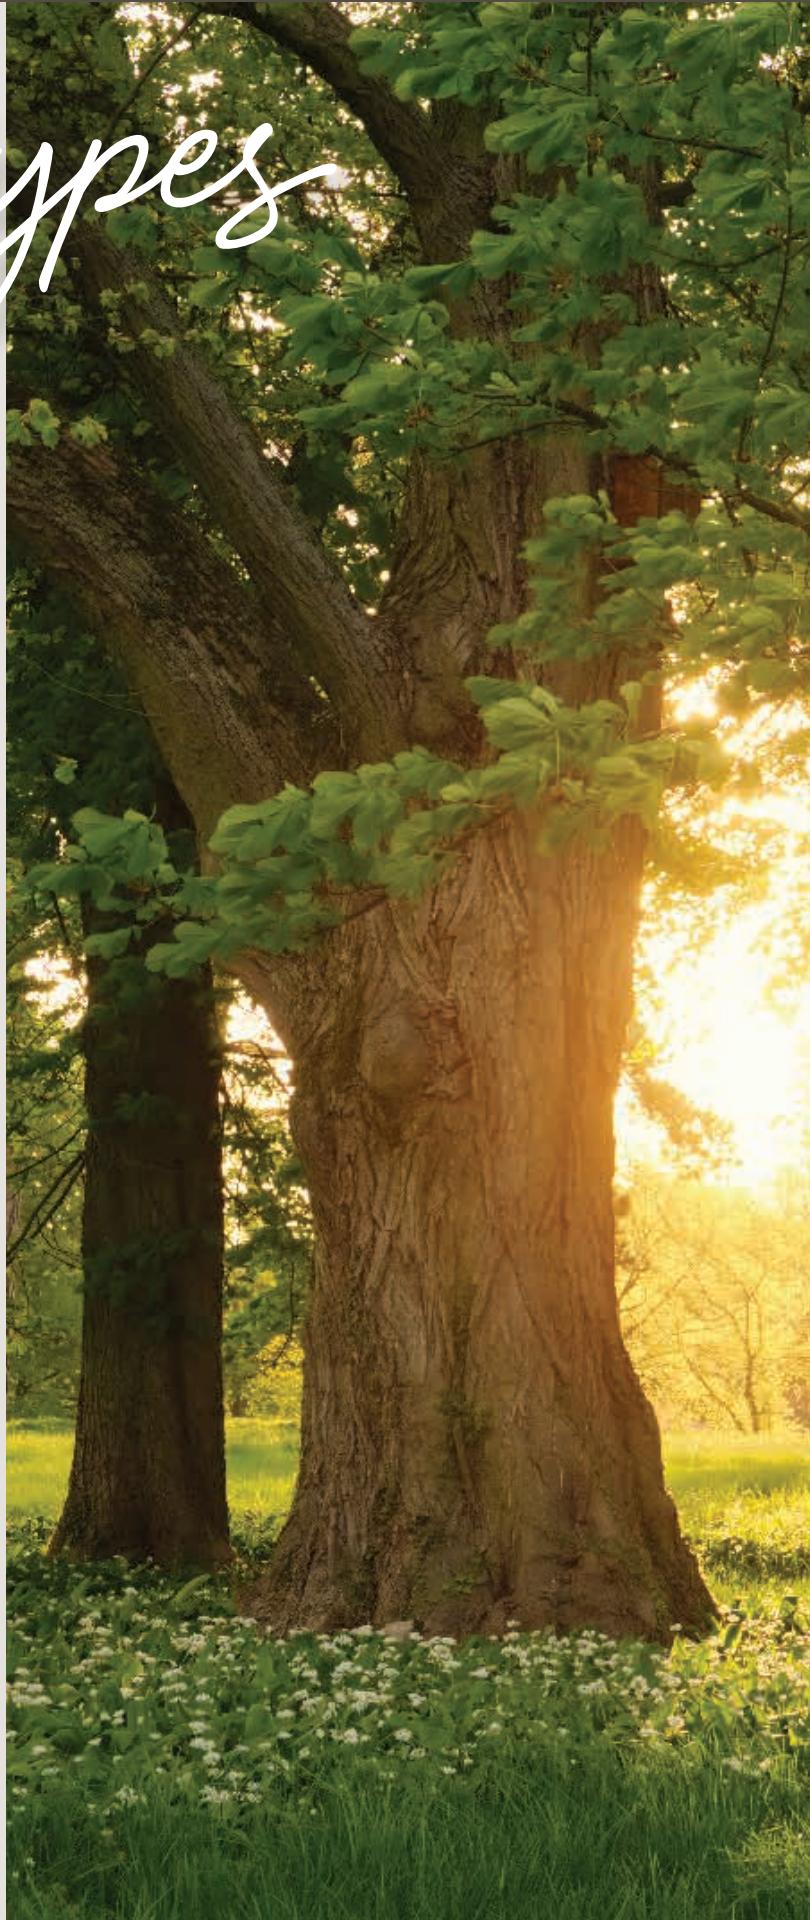

**Lyptus** is a hard, fine-grain hardwood with a rich, warm tone. Lyptus comes from fast-growing eucalyptus trees that are ready to be harvested within 14 to 16 years of planting. These trees are grown on non-tropical, certified plantations. Color variations can be extreme, but they are minimized when you choose a darker stain. More than most woods, Lyptus mellows and darkens with exposure to light. When Lyptus is stained in a dark color, it looks very much like mahogany.

**Maple** is a versatile hardwood with a fine, smooth grain. It varies in color from nearly white to a slightly reddish brown. Mineral or sugar streaks occur naturally in Maple and can vary from piece to piece. Variations will be more noticeable in lighter stains.

**Oak** is a strong wood with a long linear grain, often displaying tiny rays. You may notice small pinholes and tight knots. Color will range from golden blonde to deeper reddish tones. This cut of Oak is known as flat sawn.

**Quarter Sawn Oak** is milled at an angle of 60 to 90 degrees from the grain, allowing rays and flecks to become visible, giving the wood a unique, often vintage, character and dimension.

The grain of StarMark Cabinetry's **Exotic Veneers**—Bamboo, Rosewood, Wenge—runs horizontally, not vertically. Underneath each veneer is a core that's certified NAUF—no added urea formaldehyde. To create the Bamboo veneer, bamboo is steamed (caramelized) to create a rich tone. The Rosewood and Wenge are created from renewable plantation hardwoods.

## ENVIRONMENT

StarMark Cabinetry is CARB II compliant and ESP certified. Kitchen Cabinet Manufacturers Association Environmental Stewardship Program All products impact the environment. For ESP program criteria, visit [greencabinetsource.org](http://greencabinetsource.org).

## STARMARK CABINETRY IS ESP CERTIFIED.

In 2006, the Kitchen Cabinet Manufacturers Association ([www.kcma.org](http://www.kcma.org)) began certifying cabinet manufacturers who prove they are using sustainable practices and products. Certification must be earned yearly.

StarMark Cabinetry was one of the first companies to earn ESP certification, and we have earned the certification each year. ESP certification is awarded to manufacturers who use materials with low formaldehyde emissions, use recycled materials, and use hardwoods certified through a recognized sustainable forestry program.

ESP requires manufacturers to have a written environmental policy and to work with their suppliers to protect the environment.

## WHY SHOULD I TRUST ESP?

Unlike other certification programs, ESP takes into account the complete life cycle of a product. ESP requires recycling and energy conservation.

Unlike many other certification programs, ESP encourages local community involvement.

Find out more about ESP at [www.greencabinetsource.org](http://greencabinetsource.org).

KCMA has proven their ability to set and enforce rigorous standards as verified by the American National Standards Institute (ANSI).

## STARMARK CABINETRY IS CARB II COMPLIANT.

In technical terms, this means 100% of StarMark Cabinetry's products are compliant with the California Air Resources Board (CARB) Airborne Toxic Control Measure (ATCM) to reduce formaldehyde emissions from composite wood products including hardwood plywood (HWPW), medium density fiberboard (MDF), and particleboard (PB) (Title 17, California Code of Regulations §93120-93120.12).

In laymen's terms, it means that StarMark Cabinetry complies with the nation's strictest regulations regarding formaldehyde.

StarMark Cabinetry's CARB II compliance coupled with its ESP certification assures that your cabinetry is manufactured by an environmentally responsible company with environmentally friendly manufacturing materials and processes.

## WARRANTY

StarMark Cabinetry's construction, materials and all finishes are covered by a Limited Lifetime Warranty.

## OVERLAY AND INSET DOOR STYLES

Overlay cabinetry has doors that "lay over" the top of the cabinet's face frame. There are two styles of overlay doors: Full International and Traditional. A Full International door style shows less of the cabinet's face frame than a Traditional door style. A Traditional door style shows the most of the cabinet's face frame. Inset cabinetry has doors that are precisely

"set into" the cabinet's face frame. We manufacture inset cabinetry with tight reveals and take great care to create square, true cabinets. When adding inset cabinetry to your home, consider:

1. Quality installation is a must. If cabinets are not installed properly, doors may appear warped even though they are not. Every homeowner should expect their walls and floors to have variations; a well-qualified installer can properly shim inset cabinetry so it does not become out of square.
2. Homeowners should be prepared to adjust their doors seasonally as temperatures change.
3. Wall and utility wall inset cabinets are 12" deep. The standard inside storage dimension is 10 $\frac{1}{4}$ ". Unless the cabinet is modified to a greater depth, the cabinet will not accommodate oversized plates or dinnerware.

Specialty Colors have characteristics that cannot be captured on a color chip, so color chips are not available in Amaretto, Bordeaux, Chateaux, Homestead, Licorice, Linen, Oatmeal and Villa. Request a door sample to view these unique, beautiful colors.

Specialty Colors are cabinetry finishes that take your room to a whole new level.

Artistic effects are added to popular colors to add character and in some cases, a vintage feel.

## STAIN

A stain is a basic yet substantial finish that adds color to wood while revealing the beauty of the grain. The wood type affects the color of the stain, so the same stain will look different on each wood type. In some cases, the difference is dramatic. For the richest, most consistent color coverage, we apply the stain and then hand rub it into the wood. There are no machine shortcuts: elbow grease is the only way to coax the luster from stained wood.

## TINTED VARNISH

The best way to describe Tinted Varnish is to say it gives cabinetry a paint-like finish. However, our Tinted Varnish is much more durable than paint. Throughout the country, this type of finish is also called "enamel" or "opaque". Tinted Varnish is available on Maple, Oak and Quarter Sawn Oak cabinetry, and each wood yields a different look. The grain of Maple wood is concealed by Tinted Varnish and the grain of Oak and Quarter Sawn Oak shows through Tinted Varnish.

## GLAZE

StarMark Cabinetry has five glaze colors: Bronze, Chocolate, Ebony, Latté and Nickel. Glazes are available to go over both stains and Tinted Varnishes. We apply the glaze by hand and then wipe it off by hand. When our craftsman wipes off the glaze, he or she can best use the glaze to define the details in that particular kitchen. The profiles on a door and drawer, and other details on cabinetry, such as corbels, rosettes or shells, are stunning when glazed. We glaze every part of your cabinetry by hand—doors, drawers, moulding and panels.

## OPTIONS FOR STANDARD PALETTE COLORS

The standard palettes for Stain and Tinted Varnish are shown on pages 48–49.

### Is your color a Stain?

- Do you want to add spattering?
- Do you want to add light chain distressing?

### Is your color a Stain with Glaze?

- Do you want to add spattering?
- Do you want to add light chain distressing?

### Is your color a Stain with Glaze and Cottage Distressing?

- Do you want to add spattering?
- Do you want to add light chain distressing?

### Is your color a Tinted Varnish?

- Do you want to add light chain distressing?

### Is your color a Tinted Varnish with Glaze?

- Do you want to add light chain distressing?

### Is your color a Tinted Varnish with Glaze and Cottage Distressing?

- Do you want to add light chain distressing?
